2. CONTENTS

Realization of professional training practices in companies or institutions related to their university studies, tutored by the University, as well as the company or institution, public or private, in which the internship period.

2.1. Prerequisites

None

2.2 Description of Contents

Contents

Completing an internship period in companies also has several objectives. On one hand, it aims to bridge the gap between a student's life experience and the experience of performing a job in a company. On the other hand, it serves as a field of experience for applying the knowledge acquired and for observing how such knowledge is applied by more experienced professionals in real-life situations. The student has a university tutor to whom they can turn for any questions or problems that may arise. The tutor is in contact with the company's supervisors where the student is undertaking their internship. At the end of this period, the company issues an evaluative report on the student's performance, while the student must write a report on their activity during the internship. The university has a specialized department called the Career Services Department, which is responsible for the management and administration of external internships. The student's tutor and the degree coordinator are in constant contact with the Career Services Department to facilitate the completion of the external internship period.

2.3. Detailed Content

As determined by the company through the business tutor, related to the functions of the assigned job position.

2.4. Training Activities

Training Activities:		
Fase to face:		
Training Activities	Hours	Percentage of In-person Attendance:
